

Smart Check: Camera based inspection

Overview

The Dimaco Smart check system provides traceable packaging inspection. The system checks that the correct labels have been applied to the pack and all essential pre-printed and over-printed data, such as barcode, dates, price and weight, are correct and legible. In addition all user changes to the system are archived, providing enhanced traceability.

◆ Your partner in quality control

Label verification

Smart Check: Pack label verification

Verifies:

- Label placement
- Label identification
- Checks hand applied labels
- Over printed data
- Over printed barcode
- Promotional labels

The Benefits:

- Avoids label mix ups
- Ensures the data is correct and legible
- Reduces the risk of product recall
- Prevents poor quality barcodes reaching the checkout
- Electronically archives inspection results
- No costly barcodes required on Promo labels
- No expensive printer interfaces
- Catch weight check independent of weigh price labeller
- Option to save all inspection images (ultimate traceability)
- Interfaces into production management systems
