

Veri-KEG : Beer Keg Leak Detection

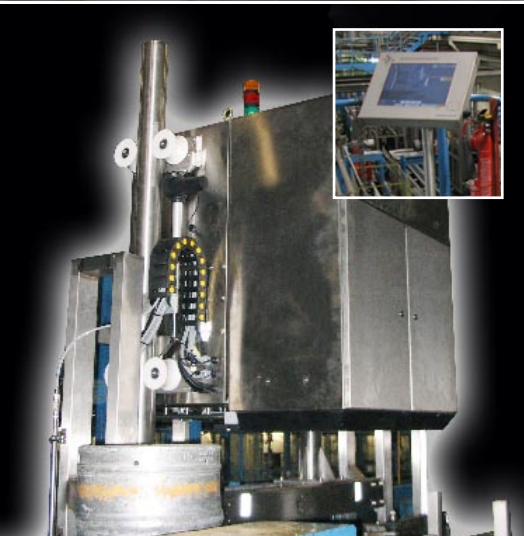

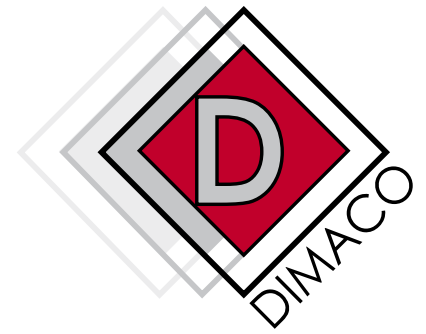

Overview

Dimaco's Veri-KEG is an inspection system that detects leaks from worn out rubber valve seals. The optical system uses a proven imaging technique to reliably inspect a mixed flow of kegs fitted with new and old spear types, of varying seal sizes and profiles.

◆ Your partner in quality control

>>> Veri-KEG : Beer Keg Leak Detection

Features:

- ◆ Detects micro leaks from keg valve
- ◆ In mix flow of new and old kegs
- ◆ In motion inspection (no stoppage)
