

Veri-OCR : Batch/Date Code Verification

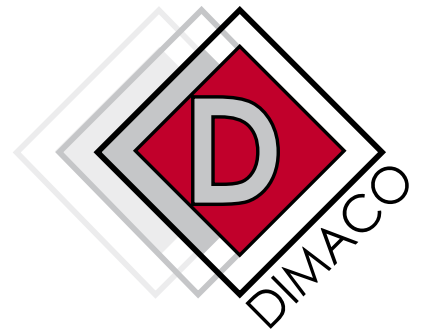

Veri-OCR

Overview

Dimaco's Veri-OCR system is a high-speed verifier of over-printed data such as batch, lot and date codes on product packaging, enabling complete traceability of packaged products, such as bottles and cans. The system ensures codes are correct, in the proper position and legible.

◆ Your partner in quality control

>>> Veri-OCR : Batch/Date Code Verification

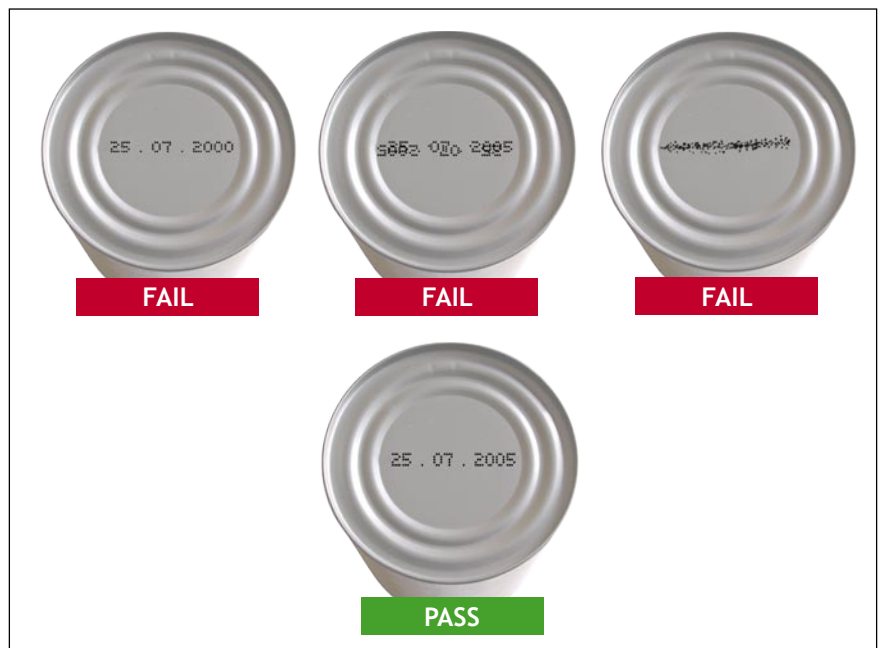

Verifies:

- ◆ Presence/placement of codes
- ◆ Correctness/legibility

The Benefits:

- ◆ Ensures the data is correct and legible
- ◆ Reduces risks of product recalls
- ◆ Reduces re-work

Batch/date code overprint verification
